

# Failure of The Progressive Narrative

by

Phil Rasmussen

When Hamas attacked Israel on October 7th, rather than condemning Hamas for its horrific acts of terror, the progressive left heralded the attack and blamed Israel for it. A month later one would think that as the facts came out, the narrative would change. Well, it did change but not as an acknowledgement that Hamas attacked Israel but rather that the Israeli military attacked its own people and blamed it on Hamas.

There are four (4) issues with the progressive narratives that makes them false and disgusting.

1. The first and most important issue is that the progressive left jumped to conclusions based on Hamas and other terrorist propaganda. They rarely, if ever, check facts before spewing their hatred for America and conservatives. They often twist facts to suit their narratives.
2. The joyful glee expressed by progressives over the killing, wounding, and taking hostage women, children, and the elderly is nothing but disgusting. There should never be joy in the murdering, whether on the battlefield or not, of innocent civilians. The same is true of also killing soldiers. The murder of any life violates the precepts of **ALL** religions including Islam, Judaism, and Christianity. For progressives and others to revel in the Jewish killings by Hamas is nothing more than a loss of personal and societal morals and ethics.
3. To say that Israel asked to be attacked by Hamas is like saying that a woman deserved to be raped because of how she dressed, talked, or acted. Even though the progressives stated that the Hamas attack was in retaliation for Israel's genocide of Palestinians there is no proof and the progressive could not produce any facts.

Similarly, progressives are not able to provide proof or facts that the Israeli military attacked its own people. In other words, just as a petulant child lies to get his way, the progressives are willing to also lie, cheat, and ignore and pervert the truth in order to get what they want.

4. Far-left progressives often leap from the frying pan and into the fire, usually making them look like fools or idiots. This can probably be attributed to their excessive egos, arrogance, and over confidence in their abilities. Such centric or self-centeredness thought often blinds them to the realities of political, economic and social environments.

Regarding issue #4, it could be said that the description may also describe Trump as a narcissist. However, the description is more likely that of "Borderline Personality Disorder" (BPD). Narcissism and BPD are often confused and misdiagnosed. As common folk, it might be best to avoid assigning any medical labels to either the progressives or Trump as such labels are more complex than what their basic "title" may imply.

There are many mental, intellectual, and reasoning problems with far-left progressives. Most have probably never challenged themselves to properly research and study both sides of the problems plaguing Israelis and Palestinians, or the conflicts in the Middle East. Instead of taking the time to understand the precepts of the three major religions of the region, the conflicts, and how hatred of the Jewish people has continued through millennium, the progressives fall victim to their own brainwashing, intellectual laziness, and shortsightedness.

The far-left progressives are reactionaries bent on destroying everything that America stands for.

The Progressives' ultimate goal is extreme socialism where you have no rights and instead of being free, you will be a slave to the government.
