

Liberty Lost

by

Phil Rasmussen

Replace Trump with John Doe and then give this action some thought. Too many of you are looking to bash Trump without thinking about the actions of our government. There were two major mistakes in this action and possibly a third. First no copy of the search warrant was given to the Trumps at the time the warrant was served. This allows for the possibility of the FBI, etc. to "rewrite" the warrant based on what was found (planted evidence, etc.) Just as law enforcement has to have a chain of custody, this also has to apply to the defendant. Second, it was sheer stupidity not to have any initial comment on why the warrant was issued or what it was for. Neither the DOJ or White House has responded. Again, this leads to the possibility of a conspiracy to commit fraud and a cover-up. Third, the actions taken by DOJ and the FBI should be questions by everyone and appropriate criminal action taken against the principles involved. The Democrats need to get over the fact that Trump was president and can run again. They are spending your money in an attempt to prevent Trump from running in the 2024 elections. These actions of the democrats in both houses of the legislature are nothing more than illegal and violate the law where government is required to stay out of the political process. The role of the media is equally at fault. While the First amendment provides for freedom of speech and a free press, the media has the responsibility to report fairly w/o bias.

The hypocrisy of the left leaning writers in these comments is amazing. Where were your allegations of mismanagement with regard to Hillary's email server, which was set up by a foreigner? Where are your perturbations over Hunter Biden's dealings with China and other foreign nationalists as revealed in his laptop? Where is your anger in your government, via Joe Biden, giving our enemies and terrorists between \$10-\$75 billion worth of military aid in the form of equipment?

The continual malfeasance of Biden, his administration, and democratically held House and Senate continues to eat away at your freedoms, take more taxes from your hard earned income, deprive you of a secure nation politically, economically and socially, bring us closer and closer to war with Russia, China, North Korea, and Iran.

You need to stop letting the media and the far-left socialists dictate your thoughts. You need to look at both sides of every issue, weigh the consequences, and make your own, independent decisions.
