

# More Government Overreach

by  
Phil Rasmussen

Since Biden came to office we have witnessed socialist, communist, and extreme leftists' actions negatively impacting many areas of our government and our lives.

With exception of a very few, the very sad thing is that, **ALL** of us have just stood by and let it happen. We are not making our voices heard, nor are we taking action to voice our concerns out in the open. We are not protesting! We are not telling local, county, and state leaders and representatives to stop this nonsense. We are doing nothing but complaining in private about this happening.

In other words: **WE ARE LETTING THIS HAPPEN!**

Biden's latest announcement a few days ago was that the government will be going "door-to-door" to "persuade" people to get the shot. In other words, Biden and the socialists are not willing to allow you choice without consequences.

If you really think about this action, you will realize two things about it. The first question that comes to mind is, "Where is the money coming from to support this effort?" The answer is very simple, your tax dollars! The second, and most important question is, "What will happen if I don't get vaccinated?" Again the answer is very simple but more complex.

When "they" go door-to-door, these puppets will have a list of names and addresses. They will mark down whether you have been vaccinated, intend to be vaccinated, or refuse to be vaccinated. So ask yourself, "Why will they be marking you down?" This is very much akin to what Hitler did at the beginning of WW2 to identify the Jews and we know how that turned out.

But there is another aspect that many subconsciously know but don't voice. During the pandemic, there was a lot of talk about our liberties being chipped away, and there is a "new threat" that we need to recognize. In a nutshell is this what you want?

**NO VACCINE = NO ???**

**"Vaccine Passports" Will Be Used To Threaten Your Rights!  
Take a Stance Now to Protect Your Rights!**

Businesses, communities, and some states are already pushing this narrative.

**We must respond and become the 2nd Greatest Generation to step up  
and save our nation and its founding principles!**
