

# Truth or Consequences

by

Phil Rasmussen

Do you remember that TV game show, "Truth or Consequences?" the premise of the show was that if the contestants failed to complete the "truth" portion, they would have to face "consequences," typically by performing an embarrassing stunt.

Other popular TV shows of the 50s and 60s included, "The Lone Ranger," "Superman," "Mr. Rogers," "The Andy Griffith Show," "Gunsmoke," and "The Ed Sullivan Show."

Whether they were comedies, westerns, or dramas, the television shows rarely indulged in foul language, sex, or demeaning the truth. For the most part television played an important role in developing and influencing the youth (us). Today however, our youth are caught up in digital social media

But along the way, the idolatries of greed, money, and power replaced the morals and ethics that were present in the past television shows but also in our schools, colleges and universities.

The TRUTH has been so abrogated that the consequences seem not to matter. Criminals are let out of jail with no bond and if found guilty, their sentences are like a slap on the wrist. The political arena is vastly corrupt and many politicians will lie at the drop of a hat. Teachers and educators have little concept of history and government that they perpetuate the beliefs of socialism and communism without any thought as to the consequences.

In looking at the past, after WW-2 the nations fought against communism (a form of socialism) until well into the 1960s when the Vietnam War ended. Yet in the 60s we saw the rise of socialistic thought and anti-war protests without any grounded thought as to the security of our community and nation.

With 9/11, we fought wars where the people initially wanted revenge but did not, and still do not, understand the enemy they wanted revenge against or were fighting. Similar to Vietnam, the public was desiring peace and the Biden administration gave it to us without thinking the consequences of their actions.

The threat today is even greater than it was after 9/11 or even a year ago. The world has seen us a a nation of weak leadership that can be easily bought and intimidated.

The issues our nation faces today are the consequences of decisions made without consideration for the consequences.

**VOTE Tuesday to  
return the government back to the People.**

Otherwise you will be at the mercy of Biden's consequences.
