

Viva la Revolution

You are standing in the midst of a political-socialist revolution. This isn't the first nor will it be the last. But it is a revolution that has already affected you!

During the 20th century there were four major socialist revolutions that each of us needs to look at. They are:

- the Bolshevik revolution fomented by Lenin and entrenched by Stalin,
- the Chinese Civil War, led by Mao Zedong,
- the Cuban Revolution conducted by Castro, and
- the Venezuelan Bolivarian Revolution, started by Chavez.

These destructive revolutions have several common attributes that are shared with what is happening now in the US:

- People disenfranchised (cancel culture)
- Censorship speech through law revision and destruction of books
- Control of people through fear and intimidation
- Confiscation of firearms, property, etc.
- Attacks on religious freedom
- Violence in the form of riots and demonstrations
- Control of politicians and dissidents

Each of these attributes has as taking place in the US during the past year and has been treated by the media, leftist politicians and liberal supporters as positive events happening to us.

You must choose between being a bystander and watching control over your life being taken over by the government, **or** by being actively involved in fighting against the socialist attempt to take over our government and eliminate your rights and freedoms.

Act now – Get Involved!
