

What If There Was No OIL?

by
Phil Rasmussen

Have you ever thought what your life would be like if we did not have any oil? That's a question that the progressive left has never asked itself. So what would our life be like?

In no particular order here is what will happen. . .

Essentially the only way you will be able to travel will be via a bicycle because:

- You will not be able to operate your gas driven automobile
- All diesel driven vehicles will come to a stop
- Construction equipment
- 16 wheeler trucks
- No gas powered lawn mowers
- No commercial air travel
- No motor driven boats, ATVs, skidoos, snowmobiles, etc.
- No luxury cruise trips (also no oversea travel vacations)

Imagine how your grocery and other shopping will happen. You will be stuck at home unless you walk or pedal a bicycle. And what about getting emergency services? The police, fire department and EMS will not be able to come to your rescue.

Let's expand on a no oil environment with regard to utilities.

- There won't be any natural gas and if you have heating, cooling and cooking gas appliance, you will have to buy new ones
- Electric companies will have to install alternative ways to produce energy but not all places have good solar or wind or water environments for this. When the companies make these changes, guess who will be paying for it – you of course.
- Water departments and treatment plants will have to change over to expensive alternative energy solutions – with you paying for these changeovers.

- The next area we will look at is what happens to those items in your everyday life. All electronics and electrical devices will eventually die and you will NOT be able to replace them. Here's why. Most of these items have plastic cases, the wiring has petroleum based insulation, and the "electronics" inside these items are made using oil.

- GPS devices
- Cameras
- Phones (land, cell, smart)
- Computers
- Ear buds
- Clocks

- Video games
- Power bars
- Toner cartridges

Now we will step toward the personal items you use for clothing and hygiene. Almost everything bit of clothing and accessories you wear is petroleum based. This includes

- Sunglasses to flip flops,
- Running shoes to umbrellas,
- Panty hose to shoe polish,
- Rain/weather jackets to boots.

But it doesn't stop there. Personal hygiene products include,

- Brush and comb
- Hair coloring
- Moisturizer
- Perfume
- Lipstick
- Dentures
- Nail polish
- Mascara contact lenses
- Shampoo
- Hearing aids
- Soap
- Shaving cream
- Vitamin capsules
- Deodorant
- Toothpaste
- Lip balm
- Etc.

And around your house:

- Toilet seats
- Plungers
- Bathtubs
- Shower stalls and curtains
- Plastic pipes
- Laundry baskets
- Linoleum
- Caulking
- Rugs and the dyes used in them
- Solar panels
- CDs and DVDs

Looking toward better healthcare, forget it because banning oil will also take care of these items.

- Aspirin
- Bandages
- Medicines
- Cortisone
- Antihistamines
- Almost all medicinal creams

Even our food chain will be effected the production and/or importation of oil is curtailed.

- Chewing gum
- Paraffin
- Wax paper
- Fertilizers
- Herbicides
- Insecticides
- Seed coating
- Almost all processed foods
- Preservatives
- Shipping and storage of foods
- Food ripening

So what will our country look like if these idiotic, stupid and narrow minded leftists and extreme environmentalist have their way?

Assuming that a ban on fossil fuels is enacted, the first thing that would happen would be extreme hoarding of gas and other fuels. The gas lines of the past will seem small compared to what we would see.

But there would be no quickly available alternative fuels as supplies are used up. Within a week, we would see a quickly diminishing economy; people would start starving, crime would increase as people go hungry.

Within 6 months or less, our nation would start tuning into a 3rd world country. There would be little difference between our country (no longer a nation) and the poorest countries in Africa.

Twelve months after the ban, fifty percent (50%) or more of our population will die because they do not know how to survive in a wilderness, will succumb to starvation, sickness, and pestilence. An underground economy, which will exceed that of the Prohibition Era, will thrive and undermine the US economy. Our cooking fuel will become our own excrement.

Fossil fuels are used for more than just transportation fuel. They are the source of dozens of petrochemicals that companies transform into versatile and valued materials for modern life. Without them we would quickly revert back to the Stone Age.

The outright banning of fossil fuels that the idiotic Biden administration and leftists want is beyond dangerous. It is sheer stupidity. A better approach would be to encourage the development of new fuels sources, AND the reconfiguration/modification of fossil fuels into fuels that present a smaller carbon footprint.

The banning of oil has nothing to do with climate control, decreasing greenhouse gases, or cleaning up the environment. It all has to do with controlling the people – a free people now but an enslaved people in the near future.

Like the proverbial ostrich, you can stick your head in the sand and say it won't happen here, but the reality of it happening is at our very own doorstep. All we need to do is take a look at the poorest of the poor third world countries to see our future – a future that condemns all of us, our children, great grandchildren, and the 3 to 4 generations that follow them.

Is this how you want to live the rest of your life, eating scrapes, bugs, heating your home with your own excrement, having to suffer through illnesses without medication, having no hope for a better future?

This is the foreseeable future that Biden, the socialists, and the left want for you!

What will you do today to stop this?
