

What's Wrong with Wind and Solar?

by
Phil Rasmussen

The **Green New Deal** is a farce and scam designed to take money and savings from taxpayers in the name of saving our planet. It is not a new idea. In fact it was first introduced in 2007 by Thomas Friedman.

In 2019 AOC and Senator Ed Markey took (stole?) Friedman's work and created a 14-page resolution that was presented to Congress but did not pass in the Senate (57-0)(43 democrats not taking a stance on it).

AOC's progressive resolution called for environmental and social justice but was extremely vague in how this would happen, and acts as a set of principles and goals rather than specific actions/policies.

While the Green New Deal has not taken actual form, parts of the plan are included in Biden's climate change plan, the current major impact of which was to put a stop to US energy independence.

We have all experienced the result of Biden's disastrous decision to close down America's energy resources. The costs in all sectors of the American economy have increased to the point where middle-class Americans have to decide whether to buy medicine or food for their children.

In Biden's mind by closing down the fossil fuel industry is reducing greenhouse gases in the US but essentially it is like taking your garbage and putting it on your neighbor's lawn. You go rid of your problem but increased that of your neighbor. That is not leadership In any way, shape or form.

Most people do not truly understand the impact of the Green New Deal. It really does not help the environment but it does cost us all more of our hard earned money.

The following video presents the outcomes of the Green New Deal in an easy to understand way.

If it sounds too good to be true, it probably isn't!
Green New Deal = Scam
