

What Is He Thinking?

by

Phil Rasmussen

We hear that question a lot from the media and people they interview when talking about Joe Biden.

The problem is that people think that Biden is “out of his mind” with decisions he makes. That is completely false.

Biden knows exactly what he is doing! How do I know this? Simply because he has not reversed his decisions. He ignores questions from the press unless he knows specifically what they are going to ask.

Simply put, if the horses escape from the barn it is because the doors were left open. But once they are out, if the doors are not closed, that is intentional. This is the reality of Biden’s actions – criminal intent!

If you look at Biden’s actions you do not see any reversals. In addition while some actions seem to be appropriate, they are just minimal, especially when he knows that Congress or the courts will not support his actions. He has consistently lied to the public and it is apparent that his allegiance lies with China and **NOT** the United States.

The question is not “is he off his rocker?” but rather “How can we stop these destructive actions?”

- Swift and decisive action is required of Congress for the next two years if our country is to survive as a democracy.
- If we continue to argue among ourselves and not come together as a nation to boycott Biden’s socialist changes, we will lose our freedoms.
- If we do not put a stop to the socialist filth that is being pushed upon us, we will become a nation of debauchery, and fall just as the Greek, Roman, and other empires fell.

If we do nothing, we will have failed ourselves.
